THE PRAVIN AGARWAL FOUNDATION

About The Foundation

The Pravin Agarwal Foundation (TPAF) is driven by Mr. Pravin Agarwal's lifelong passion to create meaningful change. Our focus on pediatric liver transplants stems from a stark reality: only 1 in 10 children in India needing a liver transplant receives it. This gap, uncovered through extensive research, fuels our commitment to address this critical need. Pediatric liver transplantation is a specialized field requiring advanced expertise, significant resources, and widespread awareness. High costs, limited access to specialized centers, and a lack of dedicated advocates have historically hindered progress. TPAF stepped into this space to bridge these gaps, driven by the belief that saving one child's life uplifts their family and community.

The unique aspect of pediatric liver transplants, where a parent often donates a portion of their liver, adds a profound layer of hope and trust to the process. This act of love reinforces transparency and credibility in organ transplantation, aligning with TPAF's core values.

In 2025, TPAF continues to pursue this cause with unwavering conviction, transforming lives through financial support, ecosystem reform, and thought leadership. Our work remains a beacon of hope for children and families across India.

Vision, Mission & Core Values

VISION

Guarantee every child afflicted with, just and uniform access to quality liver transplants and treatment.

MISSION

To help and support children by enabling liver transplantations at an affordable cost through ecosystem level change.

CORE VALUES

- Integrity
- Passion
- Inclusion
- Transparency
- Empathy
- Commitment

Focus Area

TPAF continues to work towards improving access to pediatric liver care through focused interventions that address both immediate patient needs and long-term ecosystem challenges. Our key focus areas remain:

Funds

Providing financial assistance to underprivileged children and their families to help them access timely liver transplants and related treatment. Through grants, partnerships, and fundraising support, we aim to reduce the financial burden associated with pediatric liver care.

Liver Care Ecosystem

Providing financial assistance to underprivileged children and their families to help them access timely liver transplants and related treatment. Through grants, partnerships, and fundraising support, we aim to reduce the financial burden associated with pediatric liver care.

Thought Leadership

Promoting awareness, knowledge sharing, and dialogue around pediatric liver diseases and transplantation through events, partnerships, research, and advocacy initiatives that contribute to systemic change.

Database

Developing and maintaining a comprehensive repository of information related to pediatric liver transplantation to support informed decision-making, patient care, and ecosystem development.

THE PRAVIN AGARWAL FOUNDATION

Financial Year 2025–2026

The fiscal year 2025–26 has been another significant year in TPAF's journey towards making pediatric liver care more accessible and affordable for children across India. Guided by our vision and supported by our partners, donors, hospitals, and well-wishers, we continued to expand our reach and support more families during their most challenging times.

During the year, TPAF supported 140 children through Pediatric Liver Transplants (PLTs) and Kasai Procedures (KPs), helping them access timely treatment and quality care. This contribution has enabled us to reach a cumulative milestone of over 700+ children supported since inception.

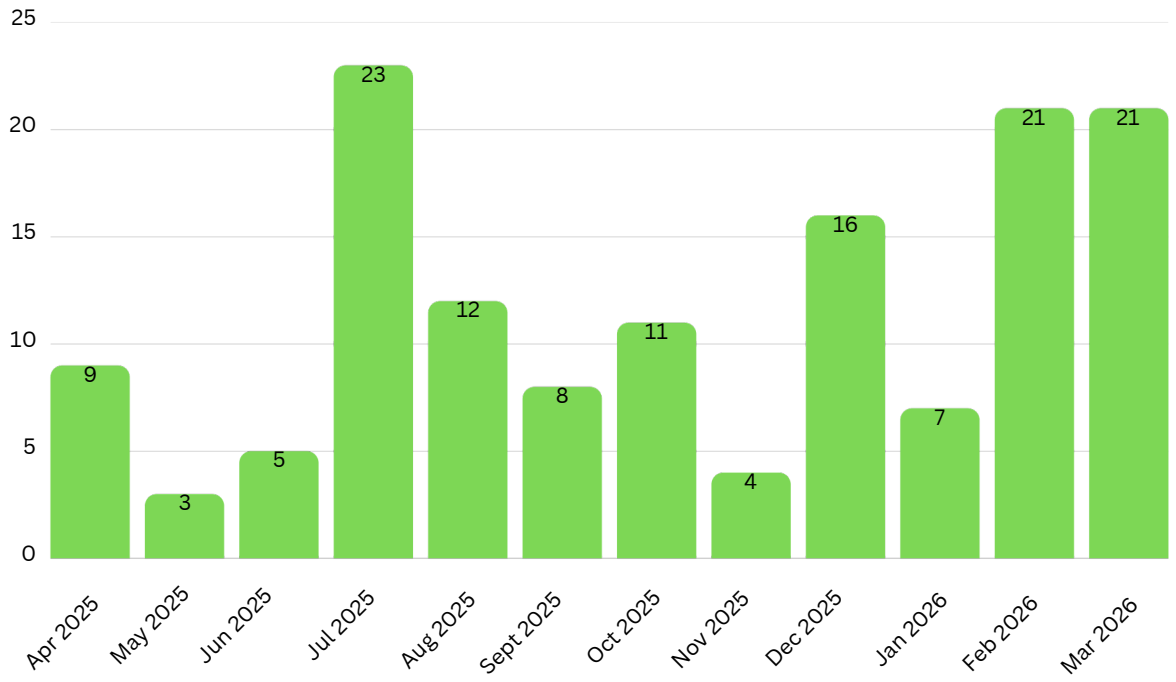

Our growing network of 25+ hospital partners across the country has played a crucial role in ensuring that children from different regions receive access to specialized liver care. Together, we have continued to strengthen the pediatric liver care ecosystem and improve outcomes for children suffering from liver diseases.

The year was also marked by continued collaboration with healthcare professionals, hospital teams, institutional partners, and supporters who share our commitment to ensuring that no child is denied life-saving treatment due to financial constraints.

THE PRAVIN AGARWAL FOUNDATION

Financial Year 2025–2026

Below is a month-wise breakdown of the children supported during FY 2025–26:

THE PRAVIN AGARWAL FOUNDATION

Programs

Pediatric Liver Transplant Support Program

This program supports children aged newborn to 17 years requiring liver transplants. In 2025, TPAF expanded financial assistance to patients across 25+ hospitals in India. The program promotes accessibility by providing grants, collaborating with crowdfunding platforms, and supporting families to ensure timely, high-quality care. Our efforts aim to make pediatric liver transplants more affordable and accessible, both in India and beyond.

Kasai Surgery Support Program

Biliary Atresia (BA), a congenital liver disease, is a leading cause of pediatric liver transplants. Without timely intervention, children with BA face liver failure by age two. The kasai procedure (KP), when performed within 60 days of birth, preserves liver function in 60-70% of cases, delaying or preventing the need for transplantation. In 2025, TPAF increased support for KP, enabling early interventions to improve long-term outcomes for children with BA. This program continues to reduce the burden of liver disease through timely care.

Message from the Founder

Every year, when I look back at the work of The Pravin Agarwal Foundation, I am reminded that behind every number is a child, a family, and a story of courage.

Over the years, I have had the privilege of meeting many parents whose lives have been turned upside down by their child's illness. I have seen their fear, their determination, and the extraordinary sacrifices they make to give their children a chance at life. These experiences continue to strengthen my belief that no child should be denied treatment because of financial difficulties.

Since the inception of TPAF, our purpose has remained simple: to help children suffering from severe liver diseases access the treatment they need. What began as a small effort has grown steadily through the support of doctors, hospitals, donors, well-wishers, and countless individuals who share our belief that every child deserves a healthy future.

This year, I had the opportunity to visit several partner hospitals and interact with transplant teams, children, and their families. These visits reaffirmed the importance of our work. They also reminded me that while we have come a long way, there are still many families searching for hope and support during difficult times.

I am deeply grateful to our hospital partners who continue to provide exceptional care, to our donors who place their trust in us, and to the TPAF team whose dedication makes this work possible every day.

As we move forward, our commitment remains unchanged. We will continue to support children in need, strengthen partnerships, and work towards a future where access to life-saving liver care is not determined by a family's financial circumstances.

To everyone who has supported this journey, I offer my sincere thanks. Together, we are helping children receive a second chance at life, and there can be no greater reward than that.

With warm regards,
Pravin Agarwal

SUCCESS STORIES

Aveer Ubhale

At just 11 months old, Aveer Ubhale had already faced more medical challenges than most children encounter in a lifetime. Today, he is a healthy and playful child, but his journey to recovery was far from easy.

Aveer was diagnosed with Biliary Atresia, a serious liver condition that requires timely intervention. In the early stages of treatment, he underwent a Kasai Procedure with support from The Pravin Agarwal Foundation. His family hoped that the surgery would improve his condition and help him lead a normal life.

However, complications soon followed. His surgical stitches reopened, requiring another surgery within just ten days. Despite multiple medical interventions, his condition continued to deteriorate, affecting both his health and growth.

For his parents, Vinod and Sapna Ubhale, the experience was emotionally overwhelming. Determined to find the best possible care for their son, they consulted specialists at Nanavati Max Super Speciality Hospital, Mumbai. After a detailed evaluation, the medical team concluded that a liver transplant was the only remaining option.

The transplant presented an additional challenge as it was an ABO-incompatible transplant, meaning the donor and recipient had different blood groups. Such procedures require extensive planning and specialized medical expertise.

At the same time, the family was struggling financially. Aveer's father worked in a shop and found it difficult to manage the cost of such a complex treatment. During this critical period, support from various charitable organizations, including The Pravin Agarwal Foundation, helped the family move forward with the transplant.

Without hesitation, Aveer's mother, Sapna, came forward as the donor. Her decision gave her son the chance he desperately needed.

The transplant was successfully completed, and Aveer gradually regained his health. Today, he is thriving, growing well, and enjoying the joys of childhood.

Yunisa Rai

In a small corner of Nepal, a young couple dreamed of a simple, happy life with their newborn daughter. Yunisa Rai, just 6 months old, had only just begun her journey in the world when life presented her family with an unimaginable challenge.

Her father, working as a chef in a cafe, and her mother, a homemaker, were overjoyed to welcome Yunisa into their lives. But their happiness soon turned into concern when they noticed that their little one wasn't as healthy as she should be. What followed was a journey filled with uncertainty, fear, and countless questions.

After medical consultations, Yunisa was diagnosed with a complex and rare condition, Cystic Biliary Atresia leading to decompensated chronic liver disease, along with multiple associated complications. The diagnosis was overwhelming, especially for parents with no medical background, trying to understand the severity of their child's condition.

With hope in their hearts, the family traveled to India for advanced treatment. At Apollo Hospital,New Delhi, a team of experienced doctors took charge of Yunisa's case. After careful evaluation, it became clear that a Liver Transplant was the only way to save her life.

For any parent, this is a moment filled with fear but also a test of unconditional love.

Without hesitation, Yunisa's mother stepped forward to become her donor. It was a decision rooted in courage, sacrifice, and a mother's unwavering determination to give her child a second chance at life.

On 2nd July 2025, Yunisa underwent a life-saving liver transplant. The journey was not easy physically, emotionally, and financially.

Today, Yunisa's story has taken a beautiful turn.
She is now healthy, growing, and embracing life just like any other child her age.
Yunisa's journey is not just about survival, it is about a mother's love, a family's strength, and the impact of the right support system coming together at the right time.
Her story reminds us that even in the most complex medical challenges, hope can find its way and sometimes, it travels across borders to save a life.

Hamza Walikar

Hamza Walikar, a four-year-old from Pune, is a lively child who enjoys playing and spending time with his family. His bright smile today reflects a remarkable journey of resilience, hope, and recovery.

As an infant, Hamza began experiencing abdominal swelling caused by fluid accumulation. Concerned about his condition, his parents sought medical advice and underwent a series of investigations. Doctors eventually diagnosed him with decompensated liver disease with portal hypertension, a serious condition in which the liver is severely damaged and unable to function properly.

The medical team advised that a liver transplant was the only option to save his life.

While the diagnosis was difficult for the family to accept, they remained determined to do everything possible for their son. After the necessary evaluations, Hamza's father, Azharuddin Walikar, was identified as a suitable donor. Working in the fabrication industry, Azharuddin did not hesitate to take this life-changing step for his child.

The transplant was performed at Ruby Hall Clinic, Pune, under the guidance of Dr. Vishnu Biradar and Dr. Manoj Shrivastava throughout the process, the medical team supported the family and helped them navigate the challenges associated with transplantation.

Like many families facing complex medical treatment, the Walikars also experienced financial difficulties. The Pravin Agarwal Foundation provided financial assistance, helping the family access the treatment Hamza urgently needed.

The transplant was successful, and Hamza recovered steadily. Today, he is healthy, energetic, and enjoying his childhood. He has even gained popularity on social media, where his cheerful personality has attracted thousands of followers.

Hamza's story is a reminder that timely treatment, family support, and collective effort can give a child not only a second chance at life but also the opportunity to thrive.

Future Outlook and Goals

SCALING PEDIATRIC LIVER TRANSPLANT SUPPORT

We aim to further expand our financial assistance and hospital network to reach more children in need, ensuring timely access to life-saving care across India.

ENHANCING KASAI PROCEDURE PROGRAM

By increasing support for early interventions, we will continue to improve outcomes for children with Biliary Atresia, reducing the need for liver transplants.

STRENGTHENING HOSPITAL PARTNERSHIPS

We will continue to build strong collaborations with leading healthcare institutions across the country, enabling greater access to specialized pediatric liver care.

EXPANDING AWARENESS AND OUTREACH

Through awareness initiatives and stakeholder engagement, we aim to improve understanding of pediatric liver diseases, early diagnosis, and timely treatment.

BUILDING A STRONGER PEDIATRIC LIVER CARE ECOSYSTEM

By working closely with healthcare professionals, donors, CSR partners, and support organizations, we will continue contributing towards a more accessible and sustainable pediatric liver care ecosystem in India.

Recognition

At The Pravin Agarwal Foundation (TPAF), we believe that strong partnerships are the cornerstone of transforming pediatric liver care in India. Our network of dedicated hospital partners continues to set new benchmarks in clinical excellence, innovation, and compassionate patient care, helping us bring life-saving liver transplant services to children across the country.

One such remarkable milestone was achieved by **Ruby Hall Clinic, Pune,** which successfully completed 100 liver transplants in just 15 months, a significant accomplishment that reflects the expertise, commitment, and collaborative spirit of its multidisciplinary transplant team. This landmark achievement marks an important contribution to advancing liver transplant care in the region and improving access to specialized treatment.

The occasion was commemorated at a grand celebratory event where Mr. Pravin Agarwal, Founder of TPAF, was invited as the Chief Guest. During the event, TPAF's continued support towards strengthening pediatric liver transplant programs and improving access to quality healthcare for children was acknowledged and appreciated.

THE PRAVIN AGARWAL FOUNDATION

TPAF Constitution

The Pravin Agarwal Foundation (TPAF) is a registered trust dedicated to making pediatric liver transplants accessible and affordable across India. Established in 2016, TPAF operates as a non-profit organization under the following legal framework:

Registration Details

- Registered under the Bombay Public Trusts Act, 1950, vide No. E-8396/Pune, dated 15.01.2019
- PAN: AADTT5065D
- Registered under section 12AB (1) (b) of the Income Tax Act 1961 Unique Registration Number for 12AB:- AADTT5065D24PN01
- Exemption obtained u/s 80G (5) (i) of the Income Tax Act, 1961 vide CIT EXEMPTION, order Dt.18.03.2026, having unique Registration Number: - AADTT5065DF20211
- NGO Darpan ID: MH/2024/0443511
- TAN: PNET15591C
- CSR Registration Number: CSR00014975

Governance

TPAF is governed by a Board of Trustees, led by Founder Mr. Pravin Agarwal, ensuring strategic oversight, transparency, and alignment with our mission to transform pediatric liver care.

Association of 41 Clubs of India

The Association of 41 Clubs of India is a nationwide organization comprising nearly 300 clubs and over 3,500 members across the country. Its members are former members of Round Table India and are also part of the global network of 41 International.

Over the years, Round Table India has made a significant contribution to education through its flagship initiative, Freedom Through Education (FTE), which has facilitated the construction of over 6,600 classrooms across India. Building on this legacy, the Association has also undertaken Freedom Through Digital Education (FTDE), a long-term initiative aligned with the vision of Digital India, aimed at improving access to quality digital learning resources for students from underserved communities.

As part of its commitment to social impact, the Association of 41 Clubs of India, Chennai, has expanded its focus to include Mother and Child Welfare as a long-term area of engagement. This includes support for pediatric healthcare initiatives and improving maternal healthcare infrastructure.

Partnership with TPAF

The Association of 41 Clubs of India, Chennai, has partnered with The Pravin Agarwal Foundation (TPAF) to support children requiring Pediatric Liver Transplants (PLTs) and contribute towards making life-saving treatment more accessible.

Purpose of the Collaboration

The partnership seeks to improve access to affordable pediatric liver care for children suffering from severe liver diseases by supporting treatment and strengthening the overall care ecosystem.

TPAF's Mission

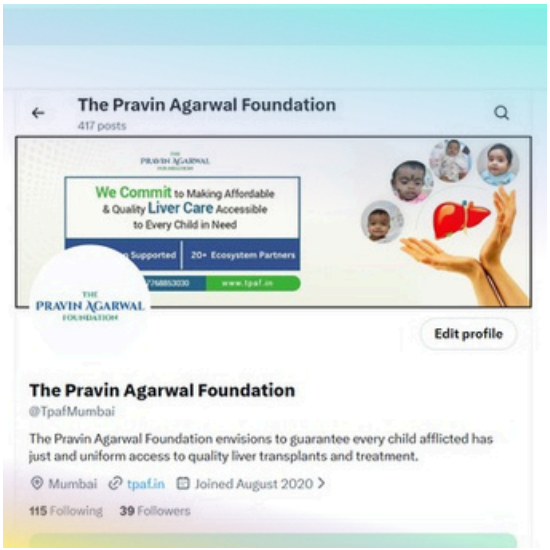

TPAF is committed to making pediatric liver transplants affordable and accessible for children across India. Since its inception, the Foundation has supported hundreds of children through Pediatric Liver Transplants and related interventions, while continuing to expand its reach through partnerships with leading hospitals and healthcare professionals.

Key Focus Areas

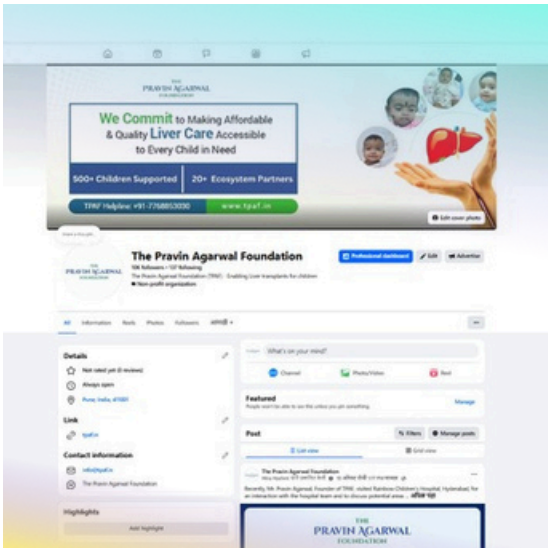

- Supporting children below 18 years of age who require Pediatric Liver Transplants.
- Strengthening the pediatric liver care ecosystem through collaboration with hospitals, medical professionals, donors, and other stakeholders.
- Driving ecosystem-level change through awareness, advocacy, and partnerships aimed at improving affordability and accessibility of treatment.
- Ensuring that children from financially disadvantaged families receive timely access to life-saving liver care.

Closing Note

As we conclude our 2025-26 Annual Report, The Pravin Agarwal Foundation (TPAF) remains deeply grateful for the unwavering support of our donors, partners, and community. With over 700+ pediatric liver transplants and kasai procedures supported and partnerships with more than 25+ hospitals, we have made significant strides in ensuring no child in India is denied life-saving care due to financial barriers.

Our journey—fueled by compassion, collaboration, and innovation—continues to transform lives through pediatric liver transplants, Kasai Procedures, and awareness initiatives. As we look to 2026, we are committed to scaling our impact, strengthening the liver care ecosystem, and advocating for a healthier future for every child.

We invite you to join us in this mission. Whether through donations, partnerships, or spreading awareness, your support makes a profound difference. Together, we can give more children the chance to thrive. Thank you for being part of TPAF's journey. Visit www.tpaf.in to stay connected and contribute to our cause.
